

CONCRETE MD SMALL BATCH MIXER

Producing ready-mix from your own portable concrete mixer will relieve so many headaches on your next project. The Concrete MD is a proven solution for many construction jobs. At a full 0.38M³ capacity, the Concrete MD makes mixing concrete by hand a thing of the past. It is compact enough to move on a flat bed or small trailer to go almost anywhere.

Operators can control when and where concrete is produced, reducing labor costs and overall ready-mix expenses on every project. On-site batching eliminates short-load fees, reduces labor costs and lost time while waiting for ready-mix trucks, allows you to mix the right quantity of concrete when you need it.

The unique counter rotating auger quickly blends concrete. The hydraulically powered auger spins in a rubber trough with special wear-plates to reduce maintenance costs. Once mixing is complete, and you are ready to place your concrete, just reverse the auger, open the discharge door and the concrete will be augered out into place.

BUILT TO LAST BY

MOBILE BATCH MIXER

SPECIFICATIONS

- 0.38M³ (0.5 cubic yard) batch capacity
- Heavy Duty Bearings
- 2-Ply Industrial Rubber Mixing Area
- Metal-Alloy Auger Protection
- 10ga. Steel Construction
- Stackable Design to Ease Shipping
- 720 lbs (mixer unit)
- 400 lbs (optional power unit)
- 35"W by 45"H by 81"L (shipping)

FEATURES

- Skid steer quick attach
- Simple auger controls
- Easy discharge door
- Leg adjustment to wheelbarrow height
- Cement bag breaker
- Debris safety screen

OPTIONS

Available options include:

- Hydraulic Power Pack
- Batch-Buckets
- Fork Pockets
- Power- Gas (standard) Diesel or Electric

USES

The Concrete MD is perfect for many applications including:

- Pole barns
- Fence posts
- Light Bases
- Precast
- Small pads, walkways, patios
- Block filling
